QA Tester – Full Time Employee

Edinburgh - 100%

About CashSentinel

CashSentinel is a Fintech that designs and operates digital contracting and payment solutions, targeting European online marketplaces. Our target clients operate mainly in the automotive and real estate renovation domains.

The company is profitable and growing its business volume by >150% every year. It is composed of four legal entities (Spain, Switzerland, France and UK) and employs approximately 25 people. Our IT colleagues are mainly based in Lausanne, Switzerland and Edinburgh, Scotland.

Your Role

CashSentinel embraces three core values:

- Help customers to achieve their goals
- Implement innovative ideas
- Change the status quo

To help us achieve our goal and embrace our dreams, your responsibilities will be:

- Ensure the quality, reliability and security of our contracting and payment applications before each release ;
- Design, write and maintain test plans and test cases based on product specifications and user stories ;
- Perform manual and automated testing (functional, regression, integration and API testing) ;
- Identify, document and track bugs clearly, and follow them up with the development team until they are resolved ;
- Build and improve our automated test suites and integrate them into our CI/CD pipeline ;
- Work closely with developers and the product team, and take part in sprint ceremonies and release validation ;
- Share your knowledge and quality best practices with the team and wider organization ;

Key Responsibilities

```
class QATesterCandidateTest {
        QATester candidate = new QATester(you);
        @Test
        void hasTheRequiredSkills() {
                assertTrue(candidate.hasExperienceAs("Proven experience as a QA Tester or similar role, at least 2 years"));
                assertTrue(candidate.canWrite("Clear test plans, test cases and bug reports"));
                assertTrue(candidate.hasExperienceWith("Good experience with manual and automated testing"));
                assertTrue(candidate.hasExperienceWith("API testing with tools like Postman"));
```

```
                assertTrue(candidate.hasExperienceWith("Test automation frameworks like Selenium, Cypress or JUnit"));
                assertTrue(candidate.hasSkillsIn("Angular, or otherwise similar frontend frameworks like React or Vue"));
                assertTrue(candidate.canQuery("Good knowledge of MySQL databases to check test data"));
                assertTrue(candidate.isFamiliarWith("Bug tracking tools like Jira"));
                assertTrue(candidate.isFamiliarWith("Familiarity with agile methodologies"));
        }
        @Test
        void niceToHave() {
                ++candidate.niceToHave; candidate.hasExperienceWith("Java, Docker and CI/CD pipelines");
                ++candidate.niceToHave; candidate.hasWorkedIn("Fintech or payments");
                ++candidate.niceToHave; candidate.hasCertification("ISTQB");
        }
        @AfterAll
        static void apply() {
                if (allTestsPassed()) {
                        System.out.println("Send your CV and resume to jobs@cashsentinel.com");
                        candidate.interviewIsPlanned = true;
                } else {
                        out.println("Oh nice! tell us more about these skills :)");
                }
        }
}
```
